

# Safety Talk: Can You Do the Chemical Splash Dash?

## **BENEFITS**

If a hazardous substance gets splashed onto a worker's skin or into his eye, it's critical that they be able to get to a safety shower or eyewash station quickly. That's why it's important for workers to know where this equipment is located, the shortest route to reach it and how to use it effectively.

## **HOW TO USE THE TOOL**

Give this safety talk to workers as part of their training on emergency procedures and how to respond when splashed with a chemical.
