

Cold Stress Exposure Control Policy

BENEFIT

Exposure to low temperatures, snow, wind and ice, can endanger your workers and lead to frostbite, hypothermia and other conditions. So if your workers work outside in the winter or in cold indoor environments such as meat freezers, your company should have a cold stress exposure policy.

HOW TO USE THIS TOOL

You can adapt this Model Exposure Control Policy for Cold Stress based on the specific circumstances of your workplace and the requirements of your jurisdiction's OHS laws.
