

Cold Stress Handout

BENEFITS

Protecting workers from exposure to the cold is just as important as protecting them from exposure to the heat. Workers exposed to extreme cold, snow and ice can develop injuries and illnesses such as frost bite and hypothermia. So it's critical that workers understand what cold stress is, the symptoms of common cold stress-related injuries and illnesses, appropriate first aid and—most importantly—how to protect themselves from cold stress.

HOW TO USE THE TOOL

Tailor this handout to comply with your company's OHS program and the OHS law in your jurisdiction and give it to all workers who may be exposed to the cold, snow and ice in the course of their work.
