

COVID-19 Risk Assessment & Worksite Precautions Form

Use this Risk Assessment and Worksite Precautions form, which is based on a model from the Northwest Territories/Nunavut WSCC, to identify and control COVID-19 infection risks to workers at your site. If you've already implemented control measures, you can use the form as a self-audit tool. Be sure to consult with your workplace JHSC and/or health and safety representative in carrying out your infection control program, not just for COVID-19 in times of pandemic but for all contagious diseases in times of normalcy when they return.
