

Daily Equipment Checklist

BENEFITS

Workers use various kinds of tools every day on the job, from hand tools to PPE. And it's important that they not only have these tools with them but also ensure that these tools are in good working condition each day.

HOW TO USE THE TOOL

This checklist is based on one provided by the Kwanlin Dun First Nation. Their double-sided form fits into a 6-hole punched small survey binder, which allows workers to carry it around easier. Adapt the checklist for your operations and the tools your workers use. And train workers to fill the checklist out daily and report on their toolbox meetings on the bottom.
