

Domestic Violence Policy

BENEFITS

You might not think that the duty to protect workers from violence in the workplace includes domestic or family violence. But unfortunately, domestic violence can spill over into and impact the workplace, including both the targeted worker and her co-workers.

HOW TO USE THE TOOL

Adapt this domestic violence policy for your jurisdiction's OHS laws, your OHS program, any existing workplace violence policies and related HR policies and programs. Ensure that all employees, including both workers and supervisors are trained on it.
