

Energy Company Charged for Pipeline Spill

In Oct. 2013, a pipeline spill leaked approximately 1.8 million litres of contaminated water containing a mixture of water, salt, oil and minerals onto more than 3.8 hectares of land in a remote area of northwestern Alberta. As a result, the energy company was charged with violations of the *Environmental Protection and Enhancement Act*, the *Public Lands Act* and the *Pipeline Act* [Apache Canada Ltd., Govt. News Release, Oct. 20, 2015].
