

# First Aid Inspection Dressing Rooms

# Facilities Checklist:

## Introduction: How to Use This Tool

First aid facilities need to be inspected at least once a month and more frequently after emergencies in which they're accessed. At a minimum, the inspection should verify that the facility is clean, dry, accessible, and contains the minimum contents required for a facility of that type under provincial OHS law. The following Checklist is for a First Aid Dressing Station based on BC rules (OHS Regulation, Part 3).
