

Guidelines for HANDLING, INSTALLING AND BRACING WOOD TRUSSES

Keeping construction workers away from the path of equipment and building components as they are unloaded and delivered will go a long way in maintaining a safe project site. The Guide to Creating a Work Safety Zone provides basic steps for roll off delivery, boom/crane delivery and forklift delivery.

For more health and safety information, call WorkSafeNB at 1 800 222-9775, or visit us online at www.worksafenb.ca.
