

# Heat Stress Exposure Control Policy

## **BENEFIT**

Exposure to high temperatures, humidity and other hot conditions can cause heat exhaustion, heat cramps, heat stroke and other dangerous heat-related conditions. So if your workers work outside in the summer or in hot indoor environments such as kilns or bakeries, your company should have a heat stress exposure policy.

## **HOW TO USE THIS TOOL**

You can adapt this Model Exposure Control Policy for Heat Stress based on the specific circumstances of your workplace and the requirements of your jurisdiction's OHS laws.
