Infectious Illness Preparedness Audit Checklist

Purpose

Ebola, hantavirus, norovirus, tuberculosis, measles, pertussis, avian influenza. Canada is crawling with infectious viruses right now. So, if you haven’t paid much attention to the issue since the COVID-19 pandemic, this is a good time to review your organization’s readiness for the next infectious illness outbreak. Here’s an Audit Checklist (available in both PDF and Word Doc formats) you can use to assess whether your organization has appropriate systems in place to prevent and control occupational exposure to infectious diseases, both known and emerging.
