

JHSC Recommendation Form #1

BENEFITS

One of the JHSC's most important functions is making recommendations to management on safety. For example, the JHSC may recommend that workers be retrained on fall protection if it notes that workers haven't been complying with the fall protection rules. Or it may recommend that new safety rules be implemented or safety equipment be purchased.

HOW TO USE THE TOOL

Tailor this model form for your company and the OHS laws in your jurisdiction and give it to your JHSC. They can use it when making safety recommendations to management. The form documents the area of concern, the committee's recommendation and the reasons for the recommendation.
