

OHS Inspection Readiness Toolkit

If an OHS Inspector Arrived Tomorrow, Would You Be Ready?

You probably have the policies.

You probably have the training records.

You probably have inspections, JHSC minutes, hazard assessments and corrective actions somewhere too.

The harder question is this:

Could you produce the right evidence when an inspector asks for it?

OHS Insider's new **Inspection Readiness Toolkit** helps you find the gaps before the inspector does.

It gives you a practical way to test whether your documentation, training, competency records, supervisor oversight and field practices line up with what your safety program says should be happening.

Inside you will get:

- A **15-Minute Inspection Readiness Audit** with 33 questions
- A checklist of **what inspectors may ask to see**
- An **Inspector Evidence Binder Index**

- Questions inspectors may ask **workers and supervisors**
- A printable **Inspection-Day Response Sheet**
- A **Corrective Action Follow-Up Checklist**
- A **Final Inspection Readiness Scorecard**
- A practical **48-Hour Inspection Readiness Plan**
