

Powered Mobile Equipment: Forklift Hazard Assessment & Control Form

After you identify actual and potential forklift hazards ([Click here](#) for a Model Forklift Hazard Identification Form), you need to assess them to determine the measures in place to deal with them, the need for additional measures and the priority for implementing those measures.

Forklift Hazard Assessment & Control Form

Company:

_____ Date:

Location:

_____ Completed by:

Instructions: Complete this form to record how each identified hazard associated with forklift operations at the work site were assessed, prioritized and addressed via implementation of appropriate engineering controls, work/administrative controls

and/or PPE.
