

TDGA Shipping Document Checklist

BENEFITS

When hazardous substances are transported on the roads, rails or by water, it's important that they're accompanied by documents that identify the type of substances, who they belong to, etc. That's why the federal ***Transportation of Dangerous Goods Act*** (TDGA) and *Consolidated Transportation of Dangerous Goods Regulations* (TDGA Regulations) require "dangerous goods" to be transported with documents containing certain key information.

HOW TO USE THE TOOL

Use this checklist to ensure that any dangerous goods that your company ships or gives to another company to ship are accompanied by the proper documents containing the necessary information.
