

Vehicle Safety Checklist

BENEFITS

Anyone who operates a motor vehicle as part of his or her job is at risk of being involved in a roadway crash. You can help your workers stay safe by creating a Motor Vehicle Safety Program, which can also help protect them when they're driving for non-work reasons by promoting safe driving behaviours in general.

HOW TO USE THE TOOL

Use this checklist as a guide to help you in creating a Motor Vehicle Safety Program tailored to your company, its operations and any relevant laws in your jurisdiction. The program should apply to any employee or contractor who drives a vehicle owned or leased by your company, a rental vehicle or a personal vehicle on company business.
